LANDSCAPE AND GARDEN SPECIALIST

Welcome Profile Landscape Consultancy Tree Consultancy Garden Design Contact Portfolio

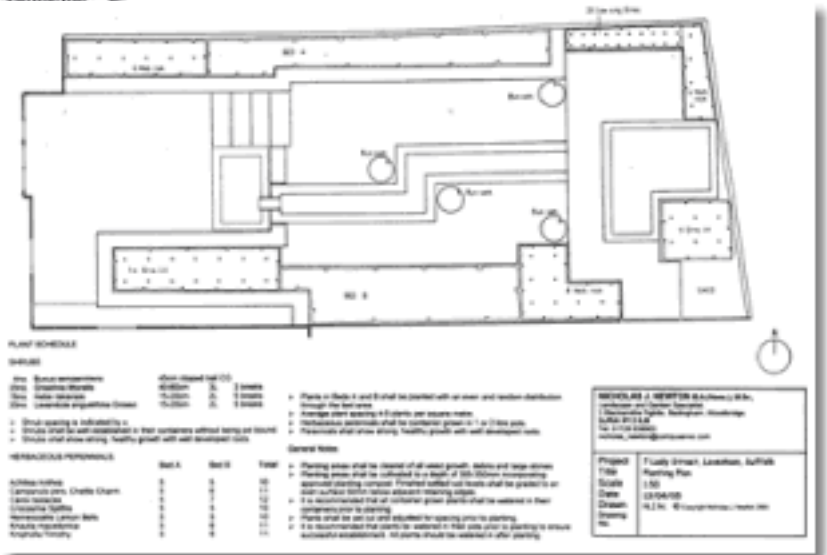

Setting Out and Construction Drawings

Once the overall concept has been agreed, the setting out and construction details plans can be prepared so that the landscape contractor can prepare estimates, set out and build the garden. Detailed construction drawings can be prepared for individual features as required.

Planting Plan

The planting plan shows the position, quantities and spacing of all plants used in the design. Choice of plants will be made according to the requirements of the brief and the prevailing growing conditions. The accompanying schedule will specify the full names, quantities and sizes of the required plants.

Project Monitoring

If you wish, and to ensure the project runs as smoothly as possible, I can act as project manager to monitor its progress through to completion.

Maintenance and Management Plans

If it would be useful, I can prepare a maintenance schedule and longer term management plan to ensure that your new garden fulfils all your wishes and objectives.

Garden Restoration

Gardens of any age and size can suffer periods of neglect often when properties are unoccupied between changing hands. With an appropriate management plan it is almost always more economical to work with the existing structure than to start again from scratch, and restructuring can be included to incorporate changes in style and use requirements, and also to reduce maintenance requirements. The restoration of a sleeping garden can be as rewarding as creating a new garden; sometimes more so.
